

Better, by Design

Usually in the world of sound and cinema, you have to choose between great design and great performance. There are exceptions of course, but in general, that's the way it is. Especially when it comes to loudspeaker design; if it looks good, it's unlikely to sound good, and for some reason, if it sounds good, it very rarely looks good. At Artcoustic, we have never accepted this idea. So when you buy an Artcoustic speaker, you get the best of both worlds. They sound great, because we have brought years of knowledge and experience to bear on designing speakers that reproduce music and movie soundtracks faithfully, accurately and in breathtaking detail. And they appeal to the eye because we came up with the idea of interchangeable screens. Quite simply, you choose how your speakers look. We have a wide portfolio of beautiful patterns and designs, and of pictures from artists and photographers including an array of iconic images from the Getty Images Gallery. We also offer a bespoke printing service where you can provide an image, for example a commissioned artwork or photograph, and we print this on to screens for your speakers. As the screens are interchangeable the image can be changed whenever you like. You choose how your speakers look, so they always complement rather than conflict with any interior design.

Going back to the roots of traditional Danish loudspeaker design, Artcoustic has transformed the conventional loudspeaker with a modern look. We strive for perfect sound reproduction, using only the most advanced technology available. Artcoustic is a state-of-the-art product, a loudspeaker that is among the elite of high-end loudspeakers worldwide. The remarkable dynamic range and efficiency, far higher than conventional hi-fi designs, make Artcoustic loudspeakers the perfect solution for both high-end residential and commercial applications.

The Artcoustic loudspeaker is the first and only of its kind, combining a unique mix of art and design with the science of acoustics.

Great looks, great sound. Great news.

Artcoustic gallery

Artcoustic hand-picks artists from around the world and invites them to create exclusive artworks for the Artcoustic Artist Portfolio. The Artcoustic Artist Portfolio is available for viewing at all specialist Artcoustic dealers. View our latest selection on the Gallery section of the Artcoustic web site. Each artwork/design is produced as a digital print and hand made into a screen.

DBO-1 Digital Bass Optimiser

Input Impedance:	10K ohms
Max.Input Level:	+9dBu
Gain Range:	-8 to 1:1 (unity)
Output:	RCA
Output impedance:	10K ohms
Max.Output Level:	+9dBu
Effect Freq. Range:	25Hz – 100Hz
Freq. Response:	(effect bypassed) 20Hz – 20kHz
THD +Noise:	(effect bypassed) -90dBaw
THD +Noise:	(effect enabled) -72dBaw
Signal to Noise:	(effect bypassed) -96dBaw
Signal to Noise:	(effect enabled) -85dBaw (Fc=50Hz)
External Power Supply:	16VAC
Dimensions:	H 44 W 215 D 65 mm

The DBO-1 is a cost-effective solution to enhance the bass performance of any Artcoustic loudspeaker or subwoofer. Based on the remarkable MaxxBass® technology and drawn from the latest research in auditory perception (psychoacoustics), the DBO-1 increases the perceived level of bass by adding harmonics to the original frequencies. This remarkable processor can extend the apparent depth of the bass by as much as 1 1/2 octaves, without requiring the speaker or subwoofer to actually deliver those signals, and without requiring additional amplifier power. This allows you to improve the bass performance of your existing system, or purchase smaller speakers and amplifiers in the first place. The DBO-1 offers a ready made way to experience outside bass from smaller Artcoustic models, such as the Diablo Monitor, the DF65-50 X2, and the Diablo Tech+1 Subwoofer. When used with larger Artcoustic speakers, such as the DF75-55 X2, the DBO-1 can potentially eliminate the need for a separate subwoofer, depending on room size and the listener's expectations. Using the DBO-1 with Artcoustic's range of on-wall subwoofers will reduce amplifier power demands, while at the same time enhancing total bass output. The DBO-1 is as easy to install and use as a conventional equalizer. Just connect it between your audio source and power amplifier, then adjust the input, frequency and output controls to taste.

In commercial applications, the use of the DBO-1 on main speakers and subwoofers can result in significant savings on amplification.

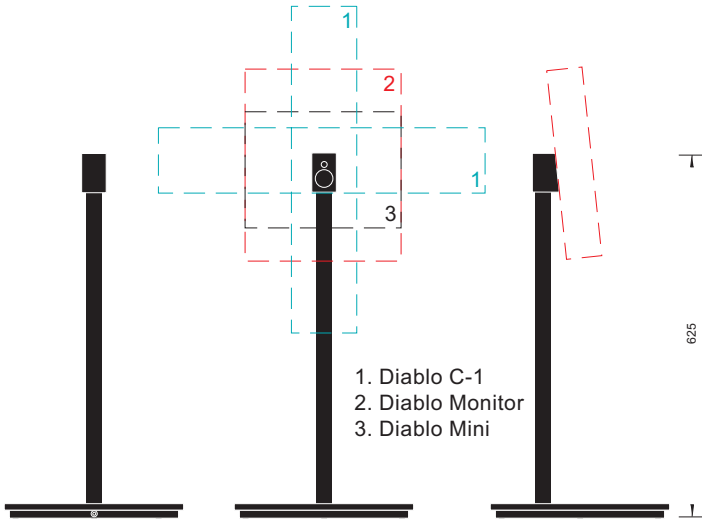

OCTO IR Repeater Kit

The Artcoustic OCTO IR repeater is ideal for controlling up to 8 units of A/V devices. The Artcoustic OCTO IR repeater kit is compatible with all standard IR remote control handsets

Diablo Stands

The Diablo stands complement the entire Diablo range where wall mounting is not possible. The stand utilises a concealed wiring system, ensuring the aesthetic appeal of any installation. The Diablo Mini, Diablo Monitor and Diablo C-1 are easily mounted by a single metal insert placed on the rear panel of the speaker.
