

Better, by Design

Usually in the world of sound and cinema, you have to choose between great design and great performance. There are exceptions of course, but in general, that's the way it is. Especially when it comes to loudspeaker design; if it looks good, it's unlikely to sound good, and for some reason, if it sounds good, it very rarely looks good. At Artcoustic, we have never accepted this idea. So when you buy an Artcoustic speaker, you get the best of both worlds. They sound great, because we have brought years of knowledge and experience to bear on designing speakers that reproduce music and movie soundtracks faithfully, accurately and in breathtaking detail. And they appeal to the eye because we came up with the idea of interchangeable screens. Quite simply, you choose how your speakers look. We have a wide portfolio of beautiful patterns and designs, and of pictures from artists and photographers including an array of iconic images from the Getty Images Gallery. We also offer a bespoke printing service where you can provide an image, for example a commissioned artwork or photograph, and we print this on to screens for your speakers. As the screens are interchangeable the image can be changed whenever you like. You choose how your speakers look, so they always complement rather than conflict with any interior design.

Going back to the roots of traditional Danish loudspeaker design, Artcoustic has transformed the conventional loudspeaker with a modern look. We strive for perfect sound reproduction, using only the most advanced technology available. Artcoustic is a state-of-the-art product, a loudspeaker that is among the elite of high-end loudspeakers worldwide. The remarkable dynamic range and efficiency, far higher than conventional hi-fi designs, make Artcoustic loudspeakers the perfect solution for both high-end residential and commercial applications.

The Artcoustic loudspeaker is the first and only of its kind, combining a unique mix of art and design with the science of acoustics.

Great looks, great sound. Great news.

Artcoustic gallery

Artcoustic hand-picks artists from around the world and invites them to create exclusive artworks for the Artcoustic Artist Portfolio. The Artcoustic Artist Portfolio is available for viewing at all specialist Artcoustic dealers. View our latest selection on the Gallery section of the Artcoustic web site. Each artwork/design is produced as a digital print and hand made into a screen.

Diablo Target Loudspeaker
 Note: All dimensions are in mm.
 Artcoustic can not be held responsible for any wrong or missing dimensions.

The Diablo Target is an extremely versatile and accurate monitor speaker. Its compact size makes it easy to accommodate in the most space-restricted environments, while its performance and sheer power belie the size of the enclosure. Featuring one rippled dome tweeter that produces a consistent, uniform high frequency performance, the Diablo Target is capable of an extended frequency response of up to 40kHz at 92dB (1w +/-2dB) and very high sound pressure levels, even from low-powered (20W+) amplifiers.

The Diablo Target is ideally suited to home cinema use in a small to medium sized room, or for near-field studio monitoring applications. It will also do a great job in commercial environments such as bars, restaurants and corporate presentation facilities. The Target features one 5 1/2" woofer and can also be used in conjunction with an Artcoustic subwoofer for even better low-frequency performance. The Diablo Target is designed for on-wall, in-ceiling and out door applications. The Diablo Target kit includes one easy to mount in-ceiling kit and the revolutionary Artcoustic target lens, which makes it possible to direct the hi frequency in a desired direction.

Diablo Target

2-way Multi purpose loudspeaker. 1 x 5.5 inch LF-MF unit, 1 x 1.5 inch 90 degree X2 HF unit. The Diablo Target is supplied with an in-ceiling kit and one white coloured metal grille. No other screen options are available.

- Operating Range: 60 Hz to 40 KHz
- Beamwidth HF: 90 degree
- FR: SPL 1 Watt 91dB Max SPL 103 dB avg 8 ohm continuous power handling 150 W
- LF: Max SPL 103 dB avg 8 ohm continuous power handling 150 W
- HF: Max SPL 104 dB avg. 4 ohm continuous power handling 100 W
- Connections: Gold plated screw terminals, single amp
- Dimensions: 200 H x 200 W x 69 D mm depth (with grille 85 D mm)
- Weight: 3.5 kg each

Applications

2-channel stereo / near field studio monitoring max. SPL 1m 103dB max. SPL 4m 95dB	Suitable
Home Cinema, small - medium room max. SPL 1m 103dB max SPL 4m 95dB	Suitable
Restaurant - Bar - fixed installation - boardroom, auditorium max. SPL 1m 103dB max SPL 4m 95dB. Also suitable for outdoor use	Suitable

Diablo Target Lens, perfect sound everywhere!

With the new revolutionary Artcoustic Target lens, it is now possible to direct your sound in a desired direction and gain near perfect acoustics in any environment. The Target lens creates a hi-frequency focal point which opens many creative possibilities. Using an in-ceiling speaker is no longer a compromise between good looking decoration and good sound. With the Diablo Target it is now possible to achieve the best of both worlds; discrete installations and studio monitor quality in-ceiling sound.

The Diablo Target is a true multi purpose all rounder, suitable for almost any application, ranging from the simple 2-channel Hifi system, to small / medium cinemas / screening rooms, near field professional monitoring and general large space public announcement and music systems.

The Diablo Target's robust design means it is also perfect for outdoor applications.

IMPORTANT!
place washer in
between grille
and cabinet

Mount the metal grille from the rear panel of the speaker cabinet

Mount the Target lens on the front of the speaker cabinet (in-ceiling only)
